From the left to right, after the ordinal number we show:
- the terms of A014486 and the terms of A063171, with the corresponding Catalan mountain range
  (i.e. Dyck path, Stanley's interpretation (i)) on their top, and the parenthesization below.
- noncrossing chord arrangements (red circle, Stanley's (n), noncrossing handshakes over a circular table).
- the plane general trees with n edges (Stanley's (e)), with the corresponding Lukasiewicz-word underneath (A079436).
- noncrossing partitions (blue circle, Stanley's (qq)), with the terms of A071156 underneath.
- noncrossing Murasaki diagrams ('genji-mon', Stanley's (rr)), with the terms of A071158 underneath.
- the plane binary trees with 2n edges (Stanley's (d)), with the corresponding zigzag tree (Stanley's (c),
  i.e. binary trees with n vertices) contained in their interior colored black.
- triangulations of a polygon with n+2 edges (Stanley's (a)).

If one counts how many structures there are of each size n, one obtains Catalan numbers, A000108.

For further information, see entry A014486 in Neil J. A. Sloane's
On-Line Encyclopedia of Integer Sequences at http://www.research.att.com/~njas/sequences/
